Art Unit: 1648

Applicant's election of Group I, claims 1-10 on October 31, 2003 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). As such, claims 11-19 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no (allowable) generic or linking claim. The requirement is still deemed proper and is therefore made FINAL.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 2-6, 9 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 2-6 and 9 are improperly drafted because the recitation of "said the" is redundant since "said" is the equivalent of "the." It is recommended that applicants choose to recite either "said" or "the." Claim 10 is improperly drafted due to a typographical error. It is asserted that claim 10 should be drafted as dependent. It appears that claim 6 should depend from claim 5, rather than claim 2, since claim 5 requires an endogenous promoter. That is, the promoters of claim 6 are all endogenous.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 10 is rejected under 35 U.S.C. 102 (b) as being clearly anticipated by Ill et al (US Patent 5,744,326). Ill et al. clearly teach a recombinant hepatitis B virus vector comprising heterologous sequences which express at least one functional heterologous gene product. Please see the claims.

Claims 1-9 appear to be free of the prior art.
